

Plared 15107[®]
Yield and premium quality

| INTRODUCTION

Plared 15107 is an everbearing variety that has quickly demonstrated significant potential for cultivation in northern regions. This variety is characterised by its open and upright growth habit, which allows for quick and efficient harvesting. The fruit is conical, shiny and ranges in colour from light to bright red, with a high percentage of marketable fruit, offering growers a profitable return. A key attribute of Plared 15107 is its consistently aromatic flavour, which has received positive feedback from our trial network partners.

| VARIETY CHARACTERISTICS

Average production:
Cold table top: 1,390 g/plant

Tall and very erect and open behaviour plant

Adapted for hydroponic production

Brix:
8.3°

Average weight of the fruit:
19 g

Clear to bright red colour

| SUGGESTED PLANTING

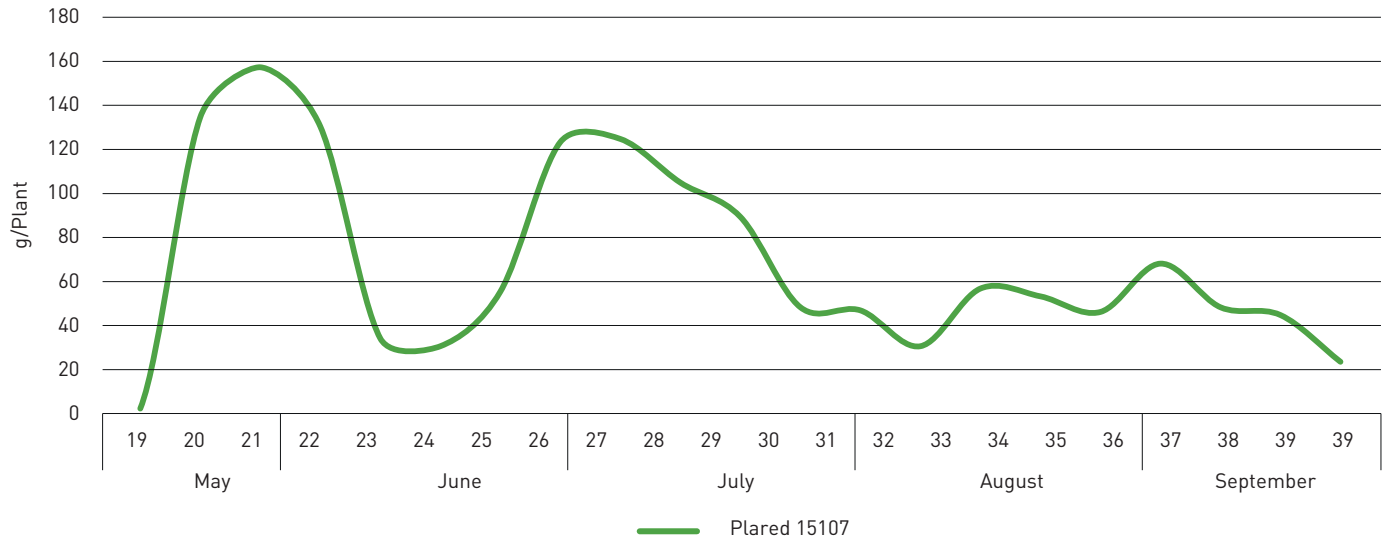

Frigo trayplant:
From February to March

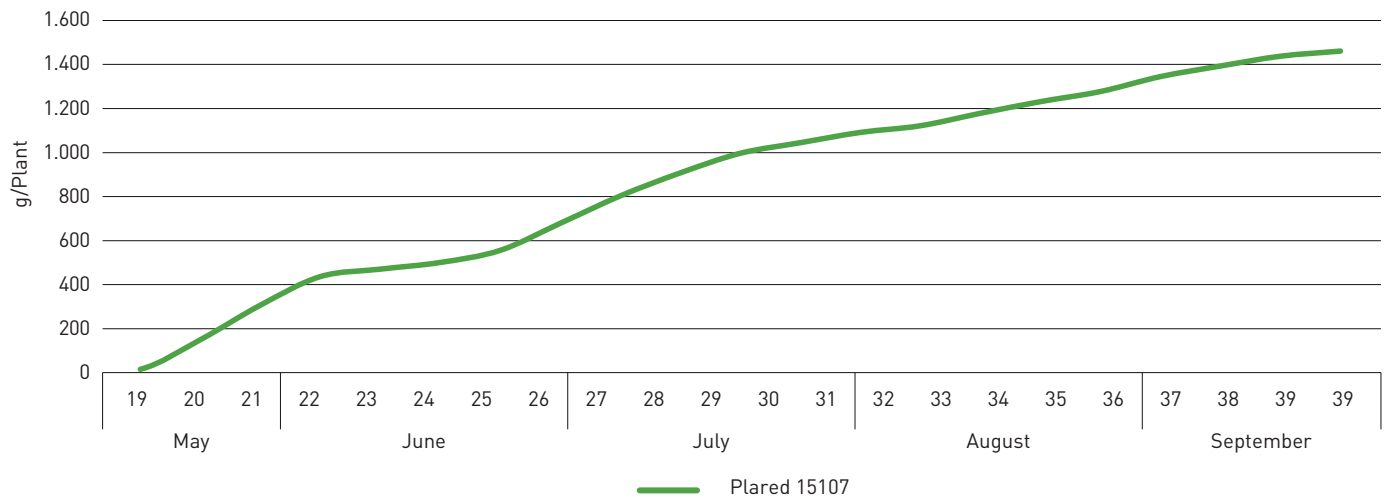

PRODUCTION CURVES

Cold table top
